monetary contributions adequate enough to ensure the carrying on of this thoroughly worthwhile tradition of the college.

ate circumstance, but not a fatal one. It is not yet too

late for the student body to come to the aid of the

new Fellowship chairman and her committee with

Incidentally, we think the writer of the letter in today's Forum Column should receive an unqualified vote of thanks for calling the attention of undergraduates to the sad state of the fellowship campaign. Coming at it does from a student not actively tied up with the campaign, the letter is an indication of that true public-spiritedness which unfortunately, and we hope temporarily, seems on the wane on the Barnard campus.

* * * * * *)*

This is the last issue of *Bulletin* before that fastapproaching period which freshmen traditionally apprehend and which even veteran seniors view with alarm. We believe there is small comfort we can give on this occasion. You really can't say, "By all means don't cram," to a person whose exam schedule calls for five exams following on each other's heels, at the rate of one and two a day. In fact, no really set system for handling an examination can be offered. A mental attitude of matching your wits against what the test paper presents and considering it somewhat of a game of skill would be an ideal one if instructors would take a similar attitude and not allow the results to outweigh all other considerations-that is, term work and midterm exams-in assigning a final mark to the student. This has been known to happen. On the other hand, the only solution to this age-old problem of conquering fear of examinations, if we must have them, is, in our opinion, the institution of a reading week between the end of classes and the beginning of examinations, in which the term's work could be integrated and in which opportunity would be presented to overcome in some measure the handicap of having examinations on consecutive days.

-L. D., '36. * * * Very fine idea. Though I don't know much about it, its points seem to be -L. D., '36. impossible. The other great disadvantage of the late appointment was that it placed the campaign in the busiest part of the school year.

of the school year. Before the drive could be launched, class chairmen had to be selected, who in turn had to choose several assistants, and printed booklets had to be obtained in order to facilitate the taking of pledges. An immediate order for the booklets, and speedy selection of assistants by class chairmen made it possible to obtain and distribute the booklets soon after the Thanksgiving holiday. Then came the slow and tedious effort to collect pledges and contributions. All committee members were urged to see everyone on their lists before the Xmas holidays. Mostly because of lack of time, in a few cases because of carelessness, it was impossible to accomplish this aim. Before the Xmas vacation, notices were sent out to all workers to complete their lists during the first week after the return from vacation. The chairman real ized how difficult this would be, but sent out the appeal as a stimulus.

day, to be exact. In previous years, the

Student Fellowship Committee could

always rely for great support on a very

green, and so very generous, freshman

class. The situation this year made this

Many students have not yet been asked to pledge to Student Fellowship, because of lack of time to make the necessary personal contacts. A little more thought on the matter will make the truth of this clear to anyone who would question it, for exactly that time when the committee members were trying to collect pledges, has been the busiest time in the year for them scholastically. Because I felt that marked resentment had been aroused by the hounding of possible pledgers during my college years, I have tried to avoid a repetition. of this as far as possible. The lack of strenuous publicity, which may have struck many, was one of the ways of accomplishing this. It seems that this was (Continued on page 5)

Musical Art Quartet Town Hall

The Musical Art Quartet, in its second concert of the season, on Tuesday, succeeded in satisfying many shades o taste by an unusual and well-balanced program of Sibelius Cowell, and Brahms.

Sibelius seems to be at his best and most powerful in the string quartet. The Voces Intimae, opus 56, is an impresive piece in five movements. Through its melodic line suggesting the country's folklore, the composer has reveale a jolly side of his nature that we had never before recognized His rich harmonies and eloquent counterpoint show him master of quartet music, surpassing his orchestral attempt

The first performance of Henry Cowell's Mosau Quartet proved a humorous interlude to the program. Writen in five movements, the order of which may be changed the quartet demonstrates not only the composer's keen wibut also an unusual power over instruments and understanding of their possibilities. And the effects he gains are notable as for instance, his elbow-playing and string-plucking on the pianoforte. In the string quartet, Mr. Cowell gets size effects and reed sounds merely through different bowin technique, and these, too, are not unpleasant. The disson ances, moreover, are treated humorously.

Little that is new can be said of the Brahms C-Minor Quartet, opus 51, No. 1. Structurally perfect, melodically and harmonically rich, it always manages to thrill Brahm lovers.

Last Tuesday's concert was flawlessly played. The e semble and remarkable tone of the Musical Art Quarter his always been admired even by the most fastidious musician Each of the four musicians is sufficiently humble to sub merge himself in his score and produce the effect of on grand instrument superbly played.

I think that the Union is considering issues that are of the utmost importance to the student today, perhaps even more through their implications than for their intrinsic value. I doubt, however, if the majority of students will do more than give the Union its passive support, for college men and women are mostly boys and girls; they like to cheer, but they decline to think or act.

Yale Physiologist Talks on Medicine

Alumnae Lecture Given by Haller

alone, to be allowed to go his own way."

Rugged Individualism was described

as the theme of two of the first prose

works of modern times. In "Robinson

Crusoe" Dafoe tells of a normal boy

who runs away to sea, is cast upon a

desert island, and succeeds with his

bare hands in conquering the savages,

acquiring a labor supply, and later escap-

He held the Puritan belief that he was

a man chosen by God to be saved, and

therefore could not fail in anything he

attempted. This popular book led many

rugged individualists to adventure in

the new world of America, where they

ing from the island.

Scientists can on longer expect to make progress only behind the closed lar faith," said Professor Haller. "There doors of the laboratory, stated Dr. are certain basic elements of the often Howard W. Haggard, of the Yale Medical Faculty, in a talk at McMillin Thearepeated story of individualistic success. tre last l'assday evening. Speaking on There must be nothing remarkable "Medicier in the Headlines," Dr. Hagabout the hero of the tale. He must be a gard talked briefly of the changing boy from our home town, with no problem science, and of contempormoney, no special learning, so that we ary news aper comments on medical may all see ourselves in his place. If he discoveries in the last few centuries. cultivated his few advantages, keeps at "The prolongation of life by stampit, works hard, he is sure to suceed. God is on his side. All he asks is to be left

ing out intectious diseases has brought about a new problem entirely," the Yale physiologist said. Medical attention today is centered chiefly on diseases of old age, the so-called degenerate diseases, since the average life span at present is over 60 years, as against the 20 years of two centuries ago, he said.

Dr. Haggard pictured health conditions prevalent in the time of Louis XIV -epidemics of typhoid, small-pox, and diphtheria, of dysentery and tuberculosis. "Only one infectious disease was at that time under control-leprosy-and that by the Biblical method of segregation," he stated. One-half of all deaths were those of children under two years of age; the mortality rate in some foundling homes and shelters being as high as 99%. Dr. Haggard commented that a possible relationship between cleanliness and health was never considered. "The discovery of the bacterial causes of disease is probably one of the few medical findings which can be compared with the discovery of fire and the invention of wheels as a primary factor in man's lasting supremacy," he continued.

Until recent years, newspapers were exceedingly haphazard and nonchalant about their reporting of scientific events, he stated. "The discovery of anaesthesia, which was not only a great but spectacular step forward, received no favorable newspaper comment until 1846," Dr. Haggard said. Previous to that time, only three items on the subject appeared in the papers: an advertisement and two protests. The former concerned itself with a demonstration of "the action of persons under the influence of nitrous oxide; volunteers from the audience will | be requested," and twelve brawny men provided to keep the situation under control. The demonstration, moreover, was guaranteed to be entertaining. There were many advertisements for patent medicines-in 1850, for example, | sarsaparilla, "the now lowly flavoring for pop," was proclaimed a panacea for all ills. Macassar oil was widely advertised and used as a hair tonic, and it was to combat the ravages of this upon upholstery that antimacassars were invented. Following the press announcements in 1895 of Roentgen's X-ray findings, bills were introduced into the legislature to forbid the manufacture of X-ray glasses for the theatre, and X-ray proof garments for women were immediately advertised.

strength. Bunyan's "Pilgrim's Progress" is the second example of a story of a simple man whose determination to arrive at a certain destination coupled with his absolute knowledge that he was one of God's elect brings him through many trials and errors to fore-ordained success. According to Professor Haller, the book might have been written by almost any rugged individualist of our time.

"The epic of Rugged Individualism," Professor Haller said, "has come straight from the Puritan pulpit. The expression of it was preached by the Pilgrims and by Bunyan, and is found in the Puritan libraries of Bradford and Harvard. And this same idea is also in John Milton's Paradise Lost,' which is essentially a Puritan sermon. Milton expounds in this great work the story of life and creation in Scriptural terms, to drive in upon Man the fact that life is an eternal war and that each man stands alone, with an equal chance of being saved by God. In 'Paradise Lost' we hear of the first Adam, who sins and must suffer to gain experience. In 'Paradise Regained' we have the second Adam, in the person of Christ, who knows how to withstand temptation. This is symbolic of the two Adams in every man, and is the theme. of the poem. If we learn by experience we are sure to win victory the second time, and then victory after victory." Professor Haller concluded his lecture often succeeded because of their tenacity with the reading of a number of pasand their firm belief in their own sages from "Paradise Lost."

Dr. Walsh Talks to Newman Club

Reasons for the Catholic Church's unfavorable attitude toward the practice of birth control were discussed by Dr. James T. Walsh, physician, psychologist, author, medical director of the Fordham School of Sociology, and Professor of Physiological Psychology at Cathedral College, before the Newman Club last Monday.

"The Catholic Church teaches that contraception constitutes a serious violation of the moral code," said Dr. Walsh. "In spite of reports to the contrary, preventive measures are uncertain, and usually either non-effective or injurious," he continued.

"The argument that birth-control would improve the race is fallacious. The Spartans, who exposed weaklings, and developed the most physically perfect race among the Greeks, left no culture. The Athenians, who did not stress physical well-being to such an extent, have been our chief source of culture," Dr. Walsh stated. He warned his audience that "The all-important thing to remember is the limitation of our/knowledge in this subject."

Dr. Walsh does not believe that feeble-mindedness is hereditary, except in relatively few cases. He does not consider any disease, strictly speaking, hereditary.

Ten Yrs. Ago Today

The report of the Curricular Commit-

tee deplores "the present policy of discouraging students from electing advanced courses in Columbia ... this is the first strain the budget should, be made to stand-even, if necessary, at the expense of such things as building, equipment-or a rapid expansion policy which sacrifices the advantages of mature students to the interests of the growing size of the freshman class."

Dean Gildersleeve, speaking to the student body, declares that "if one is in a fit physical condition, then exams are fun. . . . The Dean's pet theory, she maintained, was that at 9 p.m. on the night before "the exciting episode" the student should stop studying and indulge in some light literature-a detective story, for instance. . . . "Crammers have generally failed, and deserve to." . "If women ever hope to take their

place in the world, they must avoid weeping, avoid hysterics, and avoid fainting.'

Basil Sydney, the renowned actor, was scheduled to address the assembly after a postponement "owing to an accident to the leading lady in 'Hamlet,' in which Mr. Sydney is appearing at the Hecksher Theatre, and the necessity for training a substitute."

Student Council passed five examination rules, among which was one that "the Administration be requested to provide a checking room for the use of students during the examination period." Another, that "notices requesting silence be written on the blackboards."

The German Club heard a lecture on Baroque art. . . . The Glee Club made plans for participation in the early part of May in a Columbia University Spring Festival. . . . The Spanish Club celebrated the Festival/of the Three Kings, the Spanish Christmas, on January 7th. Italian Club heard Nina Maresi, soprano, at a musical-tea.

Forum Column ("for the expression of public opinion") contains a letter from Agnes R. Wayman, Department of Physical Education, on "certain dishonest practices recently discovered in connection with checking attendance in classes in Physical Education" and quoted from "The Prayer of a Sportsman." An editorial on "Marks" asserts "it is well to remember that the aim of a college education ought not to be confused with necessary, if you will, mechanical measuring rods." "Faculty Notes" include an item about Professor Moley, saying that he had recently conducted a survey of the administration of criminal justice in the State of Missouri under the general auspices of the State and Bar Association. The Athletic Association, it was announced, "is holding a Bear Mountain week-end between semesters. The cabin will be open only three days . . . there will be skiing, skating, toboganning, and hiking." The English Department announced, for junior and senior majors in English, a series of literary afternoons where certain authors are to read from their own work and certain others to speak on topics of special interest." A feature story describes the activities of Grace Duncan, Barnard and Journalism, '22, formerly manager of the Neighborhood Playhouse and then running the "Shipwreck Inn" at 107 Claremont Avenue, "an attractive little tea room largely patronized by Columbia and Barnard students. . . . She also finds almost as much opportunity to exercise her artistic taste in serving food and in decorating her tearoom as she did in assisting in artistic stage production." Professor Haller, in a lecture on Greek Games lyrics, stressed lyrical meter, showing "the importance of correct rhythm and meter in lyrics of any kind." . . . "Morningside," a Columbia literary publication, "extends a traternal hand to Barnard with the publication of Madge Turner's "Fiona Comes Riding" in the January issue. . . . Hervey Allen, in reviewing the story, says 'not one page of it is dull."

Make Barnard

Batnate Bulletin

Science as quoted in the press is frequently misinterpreted, Dr. Haggard stated, but the importance of medical items in the papers to educate the layman and to create an aroused public opinion cannot be overestimated.

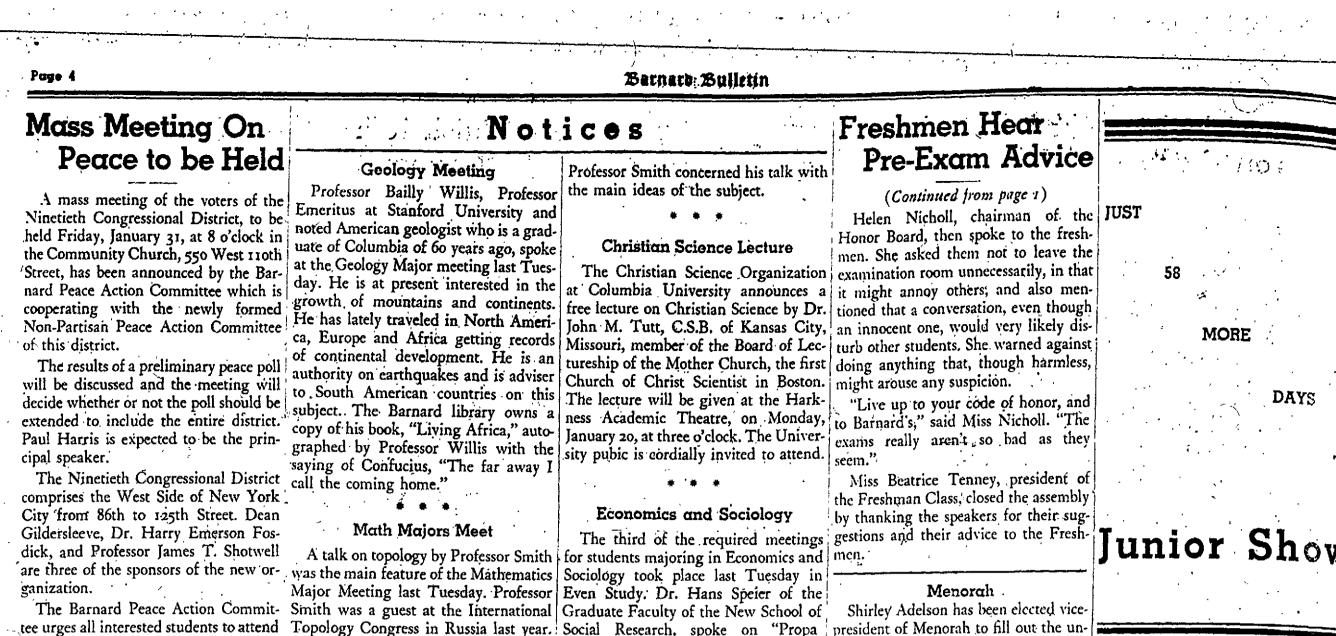

Dr. Haggard is Associate Professor of Applied Physiology at Yale University, and is an eminent author and popular lecturer. His book, "Devils, Drugs and Doctors," was a national best-seller, and his talks over the radio and from the lecture platform have received wide acclaim.

Four Names Added to Safe-Driving Pledge

The safe-driving pledge, a feature of the causing in the interest of accident prevention which Bulletin is sponsoring on the "rard campus, has been signed by Base Alice Cummings, Helen R. Nicho" K. Joyce Ryan, and Eleanor Van Heme. Additional signers' names will be ; blished at intervals in Bulletin.

Volleyball

"Interclass volleyball is a game for everyone. d Miss Crowley, and as the new semester is approaching, she and Anne Pussier, '36, the student manager of volleyby wish to remind you that when you register for your physical education classes (time of registration is the same is academic-Friday, January 31, and Marsiay and Tuesday, February 3 and 4) see should really sign-up for interclass olleyball on Tuesday and Thursday at 4 P.M.

It makes no difference whether you are a beginner or an expert as there will be three or four teams for each class, graded according to ability. On one day (the other will be used for practice) interclass and odd-even games will be played. In this way you may work for your numerals or your letter.

Miss Crowley remarked that the Senior Class has always been the final winner and that it is about time that some other class broke the precedent. Remember-register for interclass vollevball on Tuesday and Thursday at 4.

Diving

A diving exhibition demonstrating the progress that has been made in the various swimming and diving class in the course of the semester was held Monday afternoon in the pool. Those participating and the dives they performed were as follows: Harriet Benedict, standing front; Carol Kander, running front and standing front; Gertrude Stiner, running front and jackknife; Irene Lacey, swan, front jack, back, halftwist and a jack and half-twist combined. Virginia Thomas did a full twist, back dive, back pike, and a front jack combined with a half-twist. The dives were judged by Miss Crowley, and the individual result compared with the individual results compared with the previous scores to determine the amount of improvement.

Basketball

The Odds were the victors, 43-31, in the Odd-Even basketball games played Friday afternoon, January 10. The conwas decided by an Odd-Even first

I tell you this as it was told to me, by the photography editor of MORTAR-BOARD. Here is her story:

I was walking down Broadway last week, watching other people's fur coats. Suddenly a man came up and tipped his hat to me.

"Pardon me, are you Camera Carrie?" (I reached for my shoulder-holster instinctively, and then recovered my selfcontrol; he was no G-man.)

"I am. I don't believe I have the pleasure of knowing you?" I looked as haughty as I could; my mother's warnings flashed through my mind.

"May I present my card? Larl Kaemmle, at your service." He bowed. People were staring. I was uneasy; Barnard stalks everywhere. He suggested that we have a cup of coffee. I agreed. We taxied to Leon and Eddie's.

"How did you know me?" I asked. after the third cup of coffee.

"I was sent to look for you." (My hand started again towards my shoulder-holster.) "I'm from Hollywood." (I relaxed.)

"I suppose that M-G-M wants me to act in their pictures," I guessed, pleased that they should have heard of me.

"Not exactly." My face fell; fur coats began walking around again, on other of Barnard will." She smiled engagingly people's backs. "My father sent me to and borrowed my compact. .

centration of economic and political propaganda," he declared. In every community there are certain groups who are anxious to bring about social change. Youth is especially made to change society, according to Dr. Speier. "They are therefore predisposed to be affected by propaganda."

Every sort of education which appears as education from one point of view appears as propaganda from another, he maintained. "We think Soviet Education is official propaganda while they think our education is bourgeois prop-

father, anyhow?"

"Larl Kaemmle, senior."

"Where did he hear of me?" "He got hold of an advance copy of your college yearly—the MORTAR-BOARD, I think it's called. Didn't you manage the photography?"

"Yes," I said. "Does your father want me to take his picture?"

"No. He wants to offer you a job. Of course, we know that you couldn't leave college now, but the contract begins in June, 1937." He drew a paper from his vest pocket. "All you have to do is sign." I looked. Position as manager of cameramen on the lots. Annual stipend, \$25,000 per annum. Five year contract, offered on the strength of my work in arranging and taking MORTAR-BOARD pictures. No reservations. I signed. The young man looked at me romantically.

Camera Carrie sighed as she finished. Then she looked at me. "Then the alarm clock went off," she concluded, and burst into tears. I lent her my handker chief. "Nobody loves me!" she wailed.

"There, there," I said comfortingly; "MORTARBOARD does, and the rest

writing on the subject in this issue of Bulletin, but also members of the committee have felt that the Freshman class is rather in the dark as to what Student Fellowship really is. The Bulletin article at the beginning of the campaign was apparently not read enough or was not clear enough. Space does not allow for a thorough explanation at this time, but the next issue of Bulletin will contain cal.

Any suggestions as to what can be done about those students who say they are "too poor" to contribute even a coin will be welcomed. Most sincerely,

Alumnae Suggest Schedule Given Fingerprinting For Greek Games

us that perhaps Barnard Undergradu-"Who-poor little me? Who's your ates would appreciate also the privilege of cooperating in such a commendable movement. Possibly other colleges and schools might follow - and Barnard's asked. (It certainly was a small world.) leadership in such a worthy civic cause would benationally recognized.

> Of course this is only a suggestion which you may feel is impractical, but I thought I would pass it along to you for what it is worth. With all best wishes, I am,

Sincerely yours,

Dorothy Crook, Pres., Washington Barnard Club.

P.S.-I am sending some literature given out by the Justice Department on the finger-printing campaign, in case you would like some specific information. As far as the practical arrangements are concerned; I have been assured that the Department would be glad to send some representatives to the college at any convenient time.

Miss Corneille, in a statement to Bulletin on Miss Crook's letter, declared that in the proffered suggestion lies "a great chance for Barnard to take the lead in a great civic enterprise. By ready cooperation with the Department of Justice we are accomplishing two ends," the head of student government asserted, "assurance of identity in case of illness or accident to ourselves, and the crea- he taught me how to take the Count." tion of interest in a drive to promote governmental efficiency. As far as Student Council is concerned, we should be very glad to be among the first to be fingerprinted; and we trust that a large proportion of the undergraduates will follow."

Miss Corneille said that she would be interested in hearing the reactions of the students to this proposal, either through the medium of Bulletin Forum Column, or through Student Mail. "We are indeed grateful to Miss Crook for passing an explanation to satisfy the most criti- this suggestion on to us," Miss Corneille concluded.

Medical students at the University of West Virginia refer to their cadavers as "hicks" not, as is the most usual custom, as "stiffs," and therein lies a tale.

It seems that in the old days the cadavers were entrusted upon arrival to the one ond only university janitor, a campus character who spent much of his time loitering in the class rooms. One day he heard a professor of Latin, who was discussing the Aeneid, /use the phrase "Hic jacet" (here he lies).

Thereafter, upon the arrival of each new cadaver, the janitor would speak as follows: "Hick jacket, this man has come to an untimely death. The vox populi cuticorpal cutaneous pressed down on his advelorum and caused his quietus."
